

COMPLETING Your ENTRYWAY

with  **Compozit™**
Windows & Doors

ENTRY, STORM & PATIO DOOR SYSTEMS

NEW JUNE 2013

Compozit™ Makes It Easy...

The Easy Way To A Beautiful Entryway

Your Compozit™ purchase comes complete, making it the easiest way to a beautiful entryway. Our authorized dealers offer free, no obligation in-home consultation to provide you with professional advice in selecting door style, finish, hardware and an accurate measurement for exact fit.

Choose Your Door Style...

Steel entry doors with stainable steel or advanced fiberglass materials with architecturally correct rail and stile proportions with woodgrain embossing.

Choose Your Glass Style...

Beautiful combinations of decorative glass and metal coming with matching sidelites in full view, half glass and many other designs.

Choose Your Door Color...

17 paint and three stain finishes, factory-applied using an oven-cured process.

Choose Your Hardware...

A large selection of lockset designs in a variety of finishes plus factory-installed accessories (mail slots, door knockers, peepsites).

Schedule Your Professional Installation...

Trained installers will remove your old door and have your new Compozit™ entryway installed quickly with a perfect fit.

Create a Coordinated Entryway with Compozit™ Storm Doors...

Match or coordinate your Compozit™ storm door color with a Compozit™ entry door color for a beautifully designed entryway system. With matching color palettes and keyed-alike locks, your entryway is beautifully coordinated and ready with double protection.

ENERGY STAR® PARTNER

Compozit™ Windows & Doors is proud to offer ENERGY STAR® qualified entry doors. In order to earn the ENERGY STAR, entryways must meet rigid criteria for U-value and solar heat gain. Look for the ENERGY STAR label to save money on utility bills, increase the comfort of your home, and help the environment.

The Strongest Door Warranty in the Industry

Compozit™ Doors offers a 50-year, non-prorated warranty on all of our doors, certified to be free from defects in materials and workmanship from the date of installation. No other door manufacturer can match Compozit™'s high standards for quality, which begins with the initial measurement of your entryway, through our custom manufacturing process at the Compozit™ factory, to the installation by our Compozit™-Certified craftsmen. All followed by our consistent customer service.

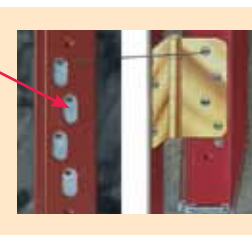

An Entryway that Fits Your Style

TruGrain® Fiberglass Door Advantages

- Our patented Nickel Vapor Deposition Technology produces the most authentic grain replication in high volume tooling to make TruGrain® the perfect wood grain door.
- Laser-precision molding process. Our process is cutting-edge technology, developed by aerospace engineers
- When stained, TruGrain® looks just like a real wood door. Available in unique styles specific to the TruGrain® Collection
- **Won't dent, crack, rot, split or warp** - Our high-impact compression molded skins will not splinter, warp, or rot. Our deep profile fiberglass skins create stronger dimensions and crisper shadow lines.
- **Full-length Stiles** - Our 4" full-length hinge & lock stiles have a 1/2" oak cap that can be trimmed. The square edge design gives a true wood door appearance.
- **Composite Top & Bottom Rails** - High-strength engineered composite top & bottom rails prevent moisture from seeping into the door.
- **Polyurethane Foam Core** - The environmentally-friendly polyurethane core used in our doors provides insulation properties that are at least four times greater than wood doors.
- **Patented adjustable hinge system** allows simple adjustment of the door (5/8" up or down, 3/16" in or out) to compensate for uneven walls, natural shifts in the home or door frame, and to ensure a perfect, weather-tight seal.
- **Woodgrain Options** - The TruGrain® Collection is available in Oak woodgrain and also has craftsman style Fir woodgrain options available in certain glass styles, creating a host of design options from which to choose.

Woodford® Fiberglass Door Advantages

- Available in a wide assortment of styles.
- Composite edges provide superior strength and durability.
- Unique molding process creates deep-profile, high-impact resistant fiberglass skins with crisp shadow lines. Surfaces are easy to clean.
- Architecturally correct stile and rail proportions creates the warmth and texture qualities of traditional wood doors with the strength and weather protection of fiberglass.
- Raised beaded molding and enhanced grain pattern provide a sophisticated, hand-crafted look compared to traditional fiberglass doors.
- Solid wood lockblock provides added reinforcement for door locks and hardware.

Stainable Steel Door Advantages

- Strong 22-gauge hot-dipped galvanized steel woodgrain door with a unitized steel perimeter for exceptional strength.
- Protective base coating ensures a beautiful finish.
- **Patented adjustable hinge system** allows simple adjustment of the door (5/8" up or down, 3/16" in or out) to compensate for uneven walls, natural shifts in the home or door frame, and to ensure a perfect, weather-tight seal.
- Stainable steel doors feature a deeply embossed wood grain design with many models that capture the look of a fine oak door. Compozit™'s exclusive accent finishing technique ensures a realistic wood look.
- **Polyurethane Foam Core** - The environmentally-friendly polyurethane core used in our doors provides insulation properties that are at least five times greater than wood doors.

HARTFORD COLLECTION

The clear bevel surrounded by granite glass creates a simple elegance. Privacy is maintained with the glue chip glass while the granite glass creates cascading light.

Complete Entryway Solutions

Sidelites and Transoms

Sidelites and transoms can dramatically expand your doorway and your decorating options. Choose from a single sidelite on either side of the door or create a “grand” entrance with dual sidelites and a matching transom. Sidelites and transoms offer attractive options to bring in more light while creating an entryway that matches the personality of your home.

French Doors

French double door units feature two operating doors - one door active and one door passive. The passive door is secured top and bottom with a sliding steel bolt at the top which interlocks with a steel plate located in the header and a sliding steel bolt which locks into the threshold system at the bottom.

French Double Door
Two doors open for increased access.

Meadowview® Patio Doors

Your backyard or deck can be easily graced by a stylish, secure Compozit™ Meadowview® Patio Door. Patio doors can be configured as a two door system with one operating door and one fixed door. Meadowview® doors are available in a variety of styles and make ideal replacements for sliding glass doors by adding a fresh, attractive appearance.

Meadowview® doors are available in all of the same colors and finishes as entry doors, including stainable steel and woodgrain fiberglass.

Classic Patio Door - Center or side hinge, right or left door opens.

The Composit™ Advantage

- Decorative or clear glass – all 1” thick and thermally sealed – provides exceptional insulation while allowing natural light into your home. Features a 20-year seal failure warranty.   
- A palette of 17 paint and three stain finishes helps reflect your style. The specially formulated industrial coatings from Sherwin-Williams are factory-applied and oven cured to ensure a hard, durable finish that will last for years. Features a ten-year warranty.  
- xGen™ high performance glass frame withstands the punishment of weather better than competitors’ frames and features a 10-year warranty – the best in the industry. 
- Decorative door hardware made by Schlage® is protected by the Ultima™ Lifetime Anti-Tarnish warranty. Features a 50-year warranty against mechanical defects, and a Grade 1 rated deadbolt for the best residential security available. (Optional decorative hardware shown)  
- Decorative accessories including peepsites, knockers, mail or magazine slots, and kickplates are available in finishes to match lock hardware. Features a 50-year finish warranty.  
- Steel lock reinforcement plate is standard on single doors with vinyl clad wood jambs for added protection against forced entry. Double doors feature top steel lock reinforcement plate on door header for astragal flush bolt. 
- Steel hinge reinforcement plates are optional on single doors with vinyl wrapped wood jambs for added security. This also prevents sagging to ensure maximum durability over the life of the entryway.  
- Your door’s solid polyurethane core is five times more energy efficient than wood and is environmentally friendly. 
- Ball-bearing hinges are engineered to eliminate door sagging. The hinge finish will match your lock hardware selection.   
- Composit™’s ENERGY STAR® qualified entry doors can keep your house comfortable and help save money on utility bills. 

- Composit™’s ALTER-LITE® Triple Pane Glass is optional on certain models. ALTER-LITE® glass provides additional energy efficiency to help you save on energy consumption. 

Ten Year Finish Warranty!

Key Benefits:

-  Beauty
-  Energy Efficiency
-  Security
-  Durability

The Anatomy of Innovation

ADJUSTABLE HINGE SYSTEM

Compozit™ offers built-in advantages unmatched in the industry. The Adjustable Hinge Plate makes it possible to adjust the door up or down, in or out. This is important because improper door alignment could cause the weather-strip seal to break. This feature available in the Stainable Steel and TruGrain Fiberglass only.

STEEL EDGE ADVANTAGE

Compozit™ Doors feature 22 gauge galvanized steel panels with interlocking edge construction—there are no wood edges which can crack, rot, warp, split and bow when force is applied. This gives you the best security rating in the industry.

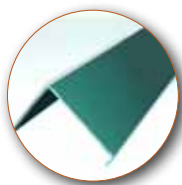

REINFORCED LOCK BLOCK

A reinforced lock block has more screw-holding power than wood. It makes installation of locksets easy, and the door remains flat around lock block—there is no distortion of door skin typically found with other lock blocks.

VINYL WRAP WOOD JAMB SYSTEM

This unique door jamb system is optional on all steel entryways and standard on all fiberglass models, it combines the strength of solid wood with an airtight, finish matched vinyl cover application. This allows the jamb the strength of wood with the color variety and beautiful finish of any Compozit™ color option.

STEEL L-FRAME JAMB SYSTEM

Our steel L-Frame jamb system is standard on all steel entryways. It fits into any existing frame for ease of installation with the added security of steel reinforcement. Not available in fiberglass models.

MAGNETIC WEATHER STRIP

Magnetic weather stripping creates a virtually airtight seal on two sides of the Stainable Steel Collection, similar to the magnetic seal on a refrigerator, minimizing air and water infiltration.

COMPRESSION GASKET

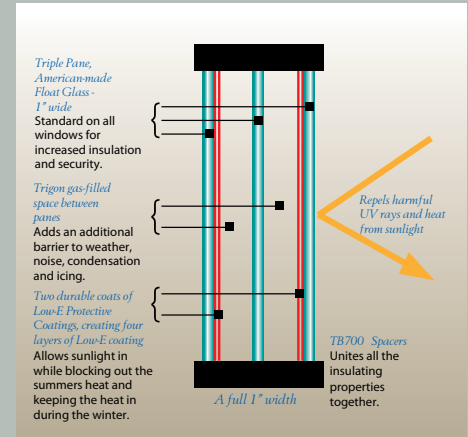

The compression gasket seals in those critical areas where water and drafts have a tendency to leak into your home. It is standard on three sides of fiberglass doors and on the hinge-side of steel doors.

ALTER-LITE TRIPLE PANE GLASS*

Our Alter-Lite® Triple Pane Glass System maximizes thermal performance. Each system

incorporates three unique gases making up Trigon gas (40% denser than air) and four low-E coatings strategically located for the best energy-efficiency to complete the glass pack.

Trigon, a safe naturally occurring gas, helps to block the transfer of heat better than air while increasing energy efficiency, adding protection from the sun's damaging rays, and helping to deaden sound.

COMPOSITE THRESHOLD

Our high dam threshold features continuous composite base that will not rot or warp. Rail and nose available in light oak woodgrain or dark brown woodgrain. Aluminum sill available in **brass, mill** or **bronze** finishes.

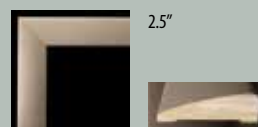

3.5"

2.5"

Colonial Style shown above.

2.5"

Ranch Style shown above.

FINISH MATCHED INTERIOR TRIM

Interior trim provides the picture frame for your entryway. Our solid wood trim is available in three profiles and can be factory stained or painted to match or complement your door.

Hardware Options

No door is complete without locks or handles, so the **Compozit™ Door System** offers a wide range of options to complete your door with just the right finishing touches. With a variety of styles and finishes for handles, knobs, locks and more, these options will punctuate any door with class, style and beauty.

All hardware prices are listed on pg. 13 of the Compozit™ Door Price Guide.

TRUCOATINGS Color Options

Compozit™ **TRUCOATINGS** Color System provides Compozit™ Doors with vibrant and consistent colors, and they have a long-lasting finish. Each color is uniquely mixed to match all of our window and door products, providing a lifetime of strength and beauty.

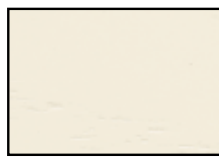

TRUCOATING colors are engineered to assure resistance against scratching, chipping and fading while blocking UV rays that can be harmful to the surface.

Whatever your finish, the right color can help differentiate your home and create impact. Our paint experts have designed these colors, as well as three wood grains, with the latest industry color trends, industry standards, and market specific needs in mind.

Compozit™ TruColorMatch®

Compozit™ also has the exclusive TRUCOLORMATCH® Custom Paint Finish Program, which expands our door finish palette across the entire Sherwin-Williams paint color spectrum. You can now choose any stock Sherwin-Williams paint color for your entryway.

The TRUCOLORMATCH® system uses **stock** Sherwin-Williams paint color formulations – not custom-

matched colors by Sherwin-Williams' stores – and will carry the same warranty as our standard paint finishes. Custom color internal muntins will not be available in the TRUCOLORMATCH® system, and we do not offer custom stain finishes beyond our current stain finishes. Additional lead time is required for TRUCOLORMATCH® finishes.

All TRUCOLORMATCH prices are listed on pg. 13 of the Compozit™ Door Price Guide.

Patio Doors

Compozit™ Sliding Patio Doors are more than custom made to size, they're custom-made to style as well. We provide a palette frame and glass options - you provide the inspiration. Mix and match frame colors to complement your interior and exterior décor, and select from a variety of decorative glass options ranging from distinctive to dramatic. After all, they're your doors. How do you see them?

All the best qualities of a window and a door combined.

STORM DOOR COLLECTIONS

Create a Compozit™ Coordinated Entryway System by matching or coordinating your Compozit™ storm door color with a Compozit™ entry door color. With **matching color palettes** and **keyed-alike locks**, your entryway is beautifully coordinated and easy to use.

Two feature-packed storm door collections...

Jamestown Collection - Our designer storm door features decorative glass and outstanding construction details.

Delaware Collection - The same outstanding construction details as our Jamestown line with added convenience features.

Compozit™ STORM DOOR FEATURES

WindResist™ overlapping frame system eliminates reveals on the face of the door to block direct winds and features triple seal weatherstripping to minimize air infiltration.

1-1/2" thick, insulated frame!

3-1/2" wide by 1-1/2" thick reinforced aluminum frame is foam-filled to insulate and provide quiet, solid operation.

Color-matched metal screw cap covers conceal installation hardware to provide the finishing touch with a clean, neat look.

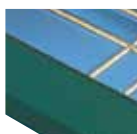

Insulated panels protect from weather!

Aluminum laminated foam panels on Delaware Collection offer excellent weather-resistance and add additional stability to the storm door.

QuikCam™ glass retention cam locks hold glass securely in place while allowing a quick and easy transition from glass to screen.

Baked on high gloss Duracron paint finish available in eight coordinating Compozit™ colors to match or complement the Compozit™ entry door color palette.

Corsica mortised hardware features rounded overlap strike plate for smooth operation and to prevent damage to storm door frame caused by hardware contact.

Heavy-duty dual color matched closers for Jamestown Collection and single color matched closer for Delaware Collection will keep your storm door operating smoothly for years.

Four heavy-duty hinges assure quiet, smooth operation.

Formed steel corner gussets prevent sagging and keep storm door square in opening.

Key Benefits:

Beauty Energy Efficiency

Security Durability

Accessories & Other Options (Jamestown & Delaware Collections)

Standard Fiberglass

Pet-resistant

Solar Guard

Screens

Standard charcoal fiberglass screens are attractive and functional. High-strength pet-resistant screens resist damage by pets. Heavy-duty fiberglass Solar Guard privacy screens are specially-designed to reduce transparency and block out heat and glare.

Low-E Glass

Low-E glass uses a special clear coating to block harmful ultraviolet rays and reduce solar heat gain to protect your entry door investment from the damaging effects of the sun. Reduces solar heat gain by 50% or more when compared to ordinary clear glass and is invisible. Optional on select models.

Tinted Glass

Available for Jamestown model SD-251 and Delaware model SD-221 only, tinted glass adds a touch of style to your entryway. Bronze or gray tint filters harmful UV rays and blocks out heat and glare while providing privacy.

The Composit™ Entryway Coordinated Color System features matching colors among Composit™ Entry Doors and Composit™ Storm Doors, but finishes are different. Composit™ Storm Doors feature high gloss finish and Composit™ Entry Doors feature low sheen finish.
